

## HEIRLOOM TOMATO SEED SALE

I've got some tomato seeds for sale from my own home-grown and spray-free tomatoes from last season (2018/2019), with some from the previous season (2017/2018) which will be perfectly viable. I've had near 100% strike rate from my seeds and am confident you'll have good success too. While every care has been taken, and tomatoes are self-fertile and rarely cross without intervention, and I'm sure you will have the plant produce the cultivar you chose, no guarantees can be made when Mother Nature is involved!

\$2.50 per packet of 10 seeds.
